ENGLISH FOR PROGRAMMING

Week 1 | Computing
(Computer Users, Computer Architecture, Peripherals)

Week 2 | Applications and Operating Systems
(Operating Systems, Graphical User Interfaces, Applications programs)

Week 3 | Software Engineering
(Design Concepts, Programming Languages, Data Security, Coding)

Week 4 | People in Computing
(Computing Jobs, Job Requirements, CV Writing + Job Interviews, The future of IT)

DURATION
4 WEEK MODULE

DAY & EVENING
TIMETABLE

INTAKES EVERY
4 WEEKS

COURSE CONTENT

This course introduces students to programming principles and the surrounding terms and language.

Embrace the history of programming, and the programming landscape as it is today.

Experience first hand and learn the basic processes used as a platform to build on with later skills. Learn introductory general syntax and specific industry language.

Our exclusive practical and group sessions are the perfect way to get your hands on modern Creative Technology, with the help of experts in the field.

More and more of us are finding that coding and programming are creeping into our industries.

It might be as simple as macros in Word or formula's in Excel, it might be making a little adjustment to a website, or turbocharging your statistics software!
